BUILT-IN SELF REPAIR FOR AN INTEGRATED CIRCUIT

BACKGROUND OF THE INVENTION

Cross-Reference to Related Applications

This application is a continuation of U.S. Application Serial No. 10/025,395, filed December 19, 2001, which is now abandoned

1. Field Of The Invention

The present invention relates generally to integrated circuits and, more particularly, to an integrated circuit having a self repair circuit thereon.

2. Description Of The Related Art

This section is intended to introduce the reader to various aspects of art that may be related to various aspects of the present invention that are described and/or claimed below. This discussion is believed to be helpful in providing the reader with background information to facilitate a better understanding of the various aspects of the present invention. Accordingly, it should be understood that these statements are to be read in this light, and not as admissions of prior art.

Microprocessor-controlled integrated circuits are used in a wide variety of applications. Such applications include personal computers, vehicle control systems, telephone networks, and a host of consumer products. As is well known, microprocessors are essentially generic devices that
